

# AMAZING BRIDGES

There are many beautiful bridges in the world

There are many Types of Bridges Which Are Given Below

BRIDGES			
LONGEST	SMALLEST	TALLEST	OLDEST

# Millau Viaduct (France) :

(Height of 336.4 meters (1,104 ft))

The Millau Viaduct (French: *Viaduc de Millau*) is a multipin cable-stayed bridge completed in 2004 across the gorge valley of the Tarn near (west of) Millau in the Aveyron department in the Occitanie Region, in Southern France. The design team was led by engineer Michel Virlogeux and English architect Norman Foster. As of September 2020, it is the tallest bridge in the world, having a structural height of 336.4 meters (1,104 ft).

The Millau Viaduct is part of the A75 A71 autoroute axis from Paris to Béziers and Montpellier. The cost of construction was approximately € 394 million (\$424 million). It was built over three years, formally inaugurated on 14 December 2004, and opened to traffic two days later on 16 December. The bridge has been consistently ranked as one of the greatest engineering achievements of modern times, and received the 2006 Outstanding Structure Award from the International Association for Bridge and Structural Engineering.
